

Dr Dejana Kosanović

viši naučni saradnik/ Senior Research Associate

Institut za medicinska istraživanja, Univerzitet u Beogradu/Institute for Medical Research, University of Belgrade

Dr Dejana Kosanović je član Srpskog društva istraživača raka i viši naučni saradnik Grupe za imunologiju, Instituta za medicinska istraživanja, Univerziteta u Beogradu, gde proučava ekspresiju glikana na paraproteinima iz seruma pacijenata sa monoklonskim gamopatijama. Kao student biologije, provela je akademsku godinu u Sjedinjenim američkim državama na Georgia State Univerzitetu u Atlanti i mesec dana u Španiji na Complutense Univerzitetu u Madridu. Bila je zaposlena u Institutu za virusologiju, vakcine i serume „Torlak“, u Beogradu (2012-2021), i sprovedla postdoktorska istraživanja u oblasti proteomike u Laboratoriji za medicinsku mikologiju na Univerzitetu Maynooth u Republici Irskoj (2018-2020).

Dr. Dejana Kosanović is a member of the Serbian Association for Cancer Research and a Senior Research Associate in the Group for Immunology, Institute for Medical Research, University of Belgrade, where she studies the expression of glycans on paraproteins from the serum of patients with monoclonal gammopathy. As a biology student, she spent an academic year in the United States at Georgia State University in Atlanta and a month in Spain at Complutense University in Madrid. She was employed at the Institute for Virology, Vaccines and Serums "Torlak", in Belgrade (2012-2021), and conducted postdoctoral research in the field of proteomics at the Laboratory of Medical Mycology at Maynooth University in the Republic of Ireland (2018-2020)
